Joe Allan Provines, DMD, has been practicing dentistry for more than 25 years. His Mountain View office specializes in both periodontics and dental implant surgery. Dr. Provines' gentle and caring personality, along with his warm and friendly staff, make every visit pleasant. This inviting atmosphere, combined with his expertise and state-of-the-art equipment, is the secret to success in his challenging field.

Dr. Provines is a member of several medical societies, including the American Dental Association, the California Dental Association, the Mid-Peninsula Dental Society, and the Santa Clara County Dental Society. He is also a fellow of the American Academy of Periodontology and the Academy of Osseointegration, and serves on the advisory board of MedPlexus, a medical software company in Santa Clara.

In Dr. Provines' words: "My practice specializes in the technique of replacing a single tooth or a full set of teeth, often being able to immediately place the dental implant the same day as the tooth is removed. To best serve my patients, I constantly study the advances in the periodontal and dental implant industry, ultimately resulting in a more successful treatment outcome."
